## Annual Ratepayers Meeting, Monday, February 13

### Local Bantam Hopes Dimmed by the Lethbridge Squad

Before an average audience the discouraged local bantams lost their first total home-to-home play-off match by an 8-4 margin to the Lethbridge squad on the Sunday afternoon of February 5 in the Coleman arena.

The local squad tallied early in the opening minutes of the game to take a 1-0 lead. Lethbridge then replied with two tallies to skate off with a 2-1 lead at the end of the period.

In the middle session the trying Coleman bantams just could not click and only managed to boost their score by one goal, while the Lethbridge boys netted three, to confidently skate off the ice with a 5-2 lead.

The final stanza was fast and looked like hockey. The local boys opened strong to score at the one minute mark to make the score 5-3. They finally seemed to bust out of a daze because in this session they hustled, fore-checked, and back-checked, and looked as if they weren't going to be beaten. But the Lethbridge net-minder performed outstandingly, stopping many sure goals. This discouraged the Coleman squad and Lethbridge bantams scored two more goals to take a 7-3 lead. The Coleman goalie also performed excellently, and stopped many more sure goals but unfortunately did not have the support the other goalie had.

Coleman tallied again at the 16:33 mark and their hopes were high, but they were immediately discouraged by the determined opposing team, who scored the final goal to skate proudly off the ice with an 8-4 win.

Columbia markers came from Lant, with two and singles from Atkinson and Noward. Lethbridge scorers were Free, with two singles from Grey, Balci, Fleming, Murdock, Garrison and Hughes.

The Coleman bantams will go to Lethbridge on Thursday, February 9 to play their last and possibly their final play-off match. They must beat the Lethbridge bantams by five goals in order to stay in the Alberta play-offs, and have the day of meeting, the next team. The local fans wish you the best of luck, bantams. Don't give up now.

### Local Women Assist Inmates Provincial Training School

Quite recently a letter of thanks was received by Mrs. Coover's, Mrs. McDonald's and Mrs. D'Amico's classes, and to Mr. P. Decco for a Christmas box of toys sent to the children at the Provincial Training School in Red Deer.

Many of the children there have no friends or relatives to send them gifts at Christmas time, or any other time, so these presents were very much appreciated.

Much is being done by the province, interested societies and members of the Parent - School organization to further the work of this school for retarded children.

A cottage at Gull Lake has just been completed by Mr. Markus, the wood-work instructor, and a group of his trainees. Each child who is able to go will be given a week's vacation at the lake during the summer months.

A project is now under way to install television sets in the school, the auditorium and villas, for the enjoyment and education of these children who ask so little but need so much.

### Television Viewers Disappointed Throughout 'Pass

Local Crows Nest Pass television viewers were disappointed Sunday as the program "Coal on the Crossroads" was not telecast and no announcement of this cancellation had been made. Owners of television sets were swamped with visitors anxious to see the production featuring scenes taken on the local strip mines. However, it has been learned that the show will be seen on CJLB-TV Channel 7 at 5 p.m. on Sunday, Feb. 19.

### Pensioners To Urge Home For Elderly Pass Residents

Approximately 20 persons attended the Old Age Pensioners Association meeting held in the Legion Club rooms in Blairmore Thursday evening when a new slate of officers was elected to office.

To head the group this year are president, Alex Morency; first vice-president, Isaac Daniels and secretary-treasurer, Emil Blas. Another meeting of the group will be held February 9 to appoint committees to handle the work of the group.

It was decided to ask delegates from all the Pass branches of the Old Age Pensioners' Association to approach town councils in the area with respect to establishing an Old Age Pensioners home in the Crows' Nest Pass. This question was brought before local councils some time ago but to date no action has been taken on the matter. It had been suggested earlier that the possibility of converting the former RCMP barracks or the Forestry branch offices in Blairmore into a home for the aged but this matter was left over.

A discussion was then held on the resolutions brought up at the recent convention of the association held in Saskatoon in October.

Ten new members were enrolled in the Blairmore branch to bring the membership to date to 46.

### Bunny Bospiel To Be Held In New Blairmore Rink

One of the highlights of the curling season in the Crows' Nest Pass towns was discussed at a meeting of the executives of the Blairmore and Bellevue curling clubs held this week when it was officially announced that the "Bunny Bospiel" will be held in the new Blairmore curling artificial ice arena during Easter. The "Bunny Bospiel," an annual event that has been held in Bellevue for a number of years, has attracted many outside rinks from Calgary, Edmonton, Lethbridge and other Alberta and British Columbia points.

It was pointed out the event was being turned over to Blairmore this year by the Bellevue Curling Club to assist Blairmore in its new ice arena. It was also expressed by the Bellevue executive that the Bellevue club was showing its appreciation this way to the Blairmore club which in former years had loaned the Bellevue club rocks and other equipment.

The interesting event will be held in the curling arena March 30 and 31 and April 1. The "spiel" formerly held in Bellevue had 64 rinks participate in the three day, four event affair but, according to Tino Catano president of the Blairmore Club this year's Bunny Bospiel, will go for 72 or 80 rinks. This decision will be made by drawmaster Milt Congdon and bospiel chairman Howard Daney.

The affair held in Bellevue had four events the Easter Bunny, the Easter Egg, Easter Bonnet and the Easter Parade and to this the Blairmore Curling Club are planning on adding one event and boosting the prize into the neighborhood of between \$1,000 and \$1,200.

First meeting to draw up plans for this event will be held at Blairmore on Feb. 15.

#### First Entries

Despite the fact that the announcement for the Bunny "spiel" was only made this week and no letters have been sent to out of town rinks, 20 entries have already been received for the event with the first rink to enter being the W. Cole rink of Calgary.

To make it more convenient for our visiting curlers the ladies of the curling club are planning to serve light lunches and meals in the arena. Arrangements for lodging and rooms are also being looked after by the club.

Herbert Jennings, Missionary, Jehovah's Witnesses

Mr. Herbert Jennings, formerly of Coleman, will be graduated from the Watch Tower Bible School of Gilead, located in South Lansing, New York, during a two-day program February 11 and 12, to be attended by an expected 2,000 persons from eastern United States and Canada.

Mr. Jennings is a minister of Jehovah's Witnesses and has been associated with the Coleman organization of Jehovah's Witnesses for three years. He left Coleman in 1953 to devote full time to the ministry at Lethbridge. In 1954 he received appointment as supervising minister over nine congregations in New Brunswick, where he served until entering the Gilead Bible School last September. Mr. Jennings is among 108 students from eight countries, including the United States, Canada, Holland, Germany, France, England, Burma and Southern Rhodesia.

As an ordained minister with an outstanding record for a number of years, he was called to the Gilead School for advanced training. The missionary school which was organized in 1943, has contributed greatly to the rapid growth of Jehovah's Witnesses, who are represented in 158 lands.

### Legion President Expresses Deep Appreciation For Efforts of C. N. P. Towards Fire Victims

President Al Krywolt of the Coleman branch of the Canadian Legion, stated today that he was very pleased with the spontaneous support to the Fire Victims' Fund sponsored by the Ladies' Auxiliary to the Legion.

The donation of \$100 cheques to four Legion members who lost everything in the recent fire in the Celli block, from the Poppy Fund of the Blairmore Canadian Legion is another striking example

of the wonderful spirit, and in line with the high tradition of which the Canadian Legion is well noted.

President Krywolt stated further that the town of Blairmore have every reason to be proud of their Legion branch for this fine effort. He was very warm in his praise for the Ladies' Auxiliary to the Coleman branch for their efforts in sponsoring the Fire Victims Fund.

### Fernie Edges Coleman

Fernie Rangers edged Coleman in a close game at Fernie last Wednesday.

The final score ended in an 8-7 victory for Fernie. The first period ended in a 2-2 tie. The second saw Coleman ahead 4-3. In the third Fernie outscored the Coleman club 5-3 to win 8-7.

Coleman scorers were Bosetti and Scodellaro with two each, while singles went to Fraser, Tarcion and Cerney.

Fernie marksmen were Marasco with four, while Caulfield and Ashmore got two each.

The win put Fernie in third place in the ABC hockey league, one point ahead of Coleman.

### Our Paper Travels

The following subscriptions have come into our office this last week:

T. K. Crawford, San Mateo, California.  
R. F. Barnes, Duncan, B. C.  
Mary Antrobus, Toronto, Ont.  
Mr. H. Oleksychnuk, Creston.  
Mrs. M. Burt, Vancouver, B. C.  
S. Bannon, Blairmore.

### Coleman Men Hurt In Auto Accident

When the car in which they were riding skidded on an icy patch of road and crashed into the Castle River bridge, three Pass men were severely injured. Eddy Yurascek, 27, and Henry Marasek, both suffered severely fractured legs and bruises. Sterling Condie received a badly broken wrist.

Damage to the car was extensive but so far no estimate has been made.

The driver of the car, whose name is not available, was released from hospital after being treated for shock and bruises.

The other injured persons are patients in the St. Vincent's Hospital at Pincher Creek.

Edwin Yurascek died Tuesday morning in Pincher Creek Hospital as a result of injuries suffered in the car accident.

### Mixed Chorus To Stage Concert;

BLAIRMORE — The Crows Nest Pass Mixed Chorus has announced that the group is planning a spring concert. No date has yet been set.

Members of the chorus under the direction of the Rev. Roy Chubb have continued rehearsals through the winter months and are coming along very nicely. Mr. Chubb is stressing the importance of strict attendance at all rehearsals. Mr. Chubb also says there is still plenty of room for more voices in the chorus and there is a real need for male voices.

There is no age limit for those interested in becoming members of the chorus.

### Former Hillcrest Man Dies At Coast

Word was received in the Crows' Nest Pass this week of the death on January 24 of Jack Petrie of Vancouver, a former resident of Hillcrest.

According to reports received Mr. Petrie, a bus driver, died of domestic gas poisoning in his basement suit, January 24. Mr. Petrie, 35, was employed as a driver by the Electric Bus Company of the coast city.

Mr. Petrie's landlord smelled gas in the home and forced his way into Mr. Petrie's room at about 2 a.m. He found Petrie in bed. He dragged him out into the hallway in a vain attempt to revive him. Vancouver police said their investigation disclosed a safety device on Mr. Petrie's stove had leaked the lethal fumes into the room. Mr. Petrie was a member of Street Railwaymen's Union.

He was born in Hillcrest and attended school here, leaving the Pass during the war years. He was predeceased by his father, Andrew Petrie, at Hillcrest.

Surviving are his mother, a daughter Donna, two sisters, Mrs. K. Laun and Mrs. R. Blomheim of Vancouver; three brothers, Ray Anderson and Allan in Vancouver and Bob in Calgary.

Funeral services were conducted in Vancouver Friday, January 27, and interment was in the Ocean View cemetery there. The Rev. William Garbutt of Vancouver officiated.

### World Day of Prayer

The world day of prayer will be held this year in St. Paul's United Church on Feb. 17th, at 7:30 p.m. This is an annual event and a cordial invitation is extended to all churches and organizations to attend this service.

There is a special program arranged and all over the world people are congregating and taking part in this service.

The theme of the service is "One Flock and One Shepherd." Let this be an outstanding worship period, come yourself and tell your friends about it. Everybody welcome.

### Trade Board and Elks Members Hold Razing Bee

Monday of last week saw a considerable number of Board of Trade members along with the members of the Elks turn out to assist Mr. Celli in demolishing the top story of his block which was destroyed by fire recently.

The ground floor was mostly water and smoke damaged and will be cleaned and remodeled into a one-story building. It was amazing how fast a group of volunteer business men cleaned up this building. Any construction company would be proud to have these men on their payroll. This is just another example of community spirit of which Coleman can be justly proud.

This paper congratulates each and every one of you who gave your time and effort to help your fellow citizen. It is hoped that Mr. Celli will be able to resume full operation of his premises in the very near future, as his services are urgently needed for our town.

### Grands Upset Kimberley

Coleman Grands came through with an upset over Kimberley in a regular ABC hockey league game held at Blairmore last Saturday.

The Coleman squad outplayed and outscored the Kimberley crew who appeared tired and could not get untracked.

Coleman led 2-1 at the end of the first; 4-1 at the end of the second and walked off with a well earned 6-2 victory at the end of the third.

Coleman scorers were Kryczka, Collings and Tymchyna with two each, while M. Mathews and R. Mathews counted singles for the Kimberley squad.

The win before a crowd of about 800 fans was Coleman's first over Kimberley in the regular ABC hockey league.

### Benefit Hockey This Week-end

A benefit hockey game for Leonard Allen, an injured player of the Coleman Grands, will be held this week-end in Coleman arena.

The game will be either between Lethbridge Alisters on Saturday, February 11, or Cranbrook on Sunday, February 12.

Arrangements will be definite by Monday and hockey fans should watch for the advertisement.

Tags for the game will be sold. To raise funds for this worthy cause the prices are: adults 75c, students 50c, and children 25c. These prices will be in effect only for the benefit game.

We need the support of everyone. Come out and give your support to the Leonard Allen fund.

### Card of Thanks

We wish to thank all those who donated or attended the shower on our behalf, and the hostesses. Also the drivers of Danny's Trucking Co. and to all others who helped and kindly assisted during and since the fire which destroyed all our belongings.

Mr. and Mrs. F. Puchko

The Goodwill W. A. of St. Paul's United Church will hold a

# World Happenings In Pictures

\*\*\*\*\*

\*\*\*\*\*

\*\*\*\*\*

\*\*\*\*\*

**SHE'S NINETEEN NOW**—Her Royal Highness Princess Alexandra Helen Elizabeth Olga Christabel, daughter of Her Royal Highness the Duchess of Kent, celebrated her 19th birthday on Christmas Day. Above she is seen in a portrait study by Dorothy Wilding.

**OLYMPIC MAIL**—Stamps pictured, above, are four of a set of 10 being issued by San Marino to commemorate the 1956 Winter Olympic Games, scheduled for Jan. 26-Feb. 6 at Cortina D'Ampezzo, Italy. They range from one to 200 lire in value. The tiny, 38-square-mile republic, situated in the Appennine Mountains in Italy's heartland, makes a tidy profit from its special stamp and coin issues.

**A "WELCOME HOME"** greeting was awaiting truck driver Richard Lanthier as he arrived home from what was to have been a routine run from Toronto. The hero's welcome was for Lanthier's part of risking his own life to avert an explosion which could have destroyed half a block in downtown Kingston. Lanthier was going through Kingston when he heard an explosion and saw smoke pouring out of the trailer. He jammed the gas pedal to the floor, leaned on the horn to clear the road and sped through the town. When he arrived at the end of the city another explosion had ripped the back doors from the trailer. He unhitched the tractor just as the flames began to reach it and drove it safely away from the trailer. The explosion is believed to have occurred in a drum of latex rubber.

**TOY OF THE STORM**—It's not a toy boat, abandoned on a placid beach by some child. This powerful picture shows the Belgian trawler Beatrix Fernand, battered by thunderous waves onto rocks off the Bandishire Coast, Scotland. Of five crewmen who tried to swim ashore, three drowned. Three men who stayed aboard were rescued by breeches buoy.

**ATOMIC AGE CHRISTMAS TREE**—A Christmas "tree" of tin and smoke rises above the plying grounds at White Sands, New Mexico, after the launching of an A-10 Jet-General Acrobatic.

**FACING EAST**—This bronze of West German Chancellor Konrad Adenauer symbolizes the creaky strength with which the aged statesman faces the problems posed by a Germany, half of which is under Communist domination. Executed by Rudolph Wulferlange, it is on exhibit in Cologne.

## HIDDEN TREASURE

The liquid in which vegetables are canned or cooked is rich in minerals drawn from the vegetable. This should never be thrown away but should be salvaged for enrichment of soups, gravies or vegetable juice.

**PERFECTLY LOGICAL FORECAST**—F. M. Ties, of Brodhead, Wis., holds one-third of his weather forecasting equipment in his arms. The other two devices are a calendar and a bit of American Indian folklore. Ties, whose snow forecasts are gospel in many parts of the Midwest, notes date of the first snowfall deep enough to track a rat. Day of the month and number of days since the new moon figure in the formula, which indicates 45 snows will occur during the 1955-56 winter season. Ties says that his predictions have been accurate since 1921.

**RE-UNITED**—Kissel family happily re-united after 12-year separation. Jan. now 12, (centre), was six months old when Nazis invaded Poland and carried Mr. and Mrs. Jan Kissel off to Germany, Halina, in father's arms, and Jerry, five, were at airport to greet their brother who spent his first Christmas with his parents.

**THEY'LL HARVEST SURPLUSES**—U.S. Secretary of Agriculture Ezra T. Benson, centre, scoops grain from pickup truck of model threshing unit at Department of Agriculture in Washington shortly after announcing that the government will make available to overseas relief agencies as much surplus food as they can handle. Representatives of two of some 18 agencies which will share in the 1 1/2-billion-pound distribution of various products are R. Norris Wilson, left, executive director of Church World Services and Msgr. Edward Swantrom, executive director, Catholic Relief Service.

## OUR COMPLETE SHORT STORY—

## WINDHAVEN

—By ANNA E. WILSON

WIND, broad-shouldered Joel said, was just air in motion; all wind was the same. But Marnie, putting a tired hand to her head, pressing it against that spot of pain above her eye, decided that Joel must be wrong. There were all kinds of wind; there was the wind that whistled and tore through the kaplins back home sending her blonde curls streaming; there were the great sleet-laden blizzards that swept across the prairie in winter, burying trails and leaving men frozen stiff, and the wind in spring that was just a gentle breathing—then there was this wind that blew for days and days until it got into your head and burned a tight band about your forehead.

Joel came in to dinner. "I must let up soon, Marnie. It's never blown this long before."

"It'll never stop, Joel."

Joel got up to go back to work but before going he placed a rough hand on Marnie's head. "Take an aspirin and get to bed, Marnie. Soon as we get the wheat in the elevators, we'll go east and visit Aunt Ellie for a spell."

"I can't wait, Joel."

Joel's kind, blunt face looked worried. "We've got a good start here, Marnie. It means beginning all over again. You like it here when the wind doesn't blow. Maybe running away isn't the solution. There was a man through here once said that there was never a problem in human living that hadn't been solved by someone. Maybe any other kind of life would have drawbacks, too, Marnie. Seems like we might find a better way."

"You can't stop the wind, Joel."

When Joel had gone, Marnie washed the dishes, the pain above her eye becoming each moment more unbearable. She reached for an aspirin, thinking of Joel, and stopped. It did no good to say the wind wouldn't blow tomorrow, there'd be the next year and the next.

Joel could sell the ranch and get work in a factory. She could see him in 15, in 20 years, his shoulders stooped, his hair thinner and the swing gone from his walk. Joel wouldn't blame her, but he wouldn't be happy. Joel would never be happy anywhere away from the prairie. That was what made it so hard, so impossible for her.

She looked out and nowhere was there anything but sameness, nowhere except that old bluff, bordering Dead Man's canyon, a deep cliff sheltering a rough, left the aspirin on the shelf, went into her room, hunted out her old skirt. When she bent over the blouse rushed to her head and the pain was so intense, she groaned. Marnie was so tired, she had been so early in the day. This wasn't mail time or time to ride down to the range and back with Joel. He jumped as sharp spurs dug into him and he swung around and headed into the wind as Marnie made for the bluff. Marnie fighting the bit, hating it, covered the prairie with rangy speed. It was the longest ride Marnie had ever taken alone and when she came to the bluff she cried in to the bluff and sat looking down into the canyon. It was narrow, steep with few footholds. Once Marnie had wanted to go down there but Joel had stopped her. "It isn't going down, Marnie, but getting back up. That shale's treacherous. No one here has ever tried it."

The wind was beating into the drums of her ears. The feeling in her was no longer light, the hand was gone and she felt lightheaded.

She slid down from Roanie and looked down to where a thin silver of light, water, was barely visible—it was quiet down there—the wind could never reach you. All at once Joel's warning was forgotten and she began to climb down, her feet slipping on the shale and stone. She rolled down the last 20 feet ignominiously.

She lay quiet on a tiny beach, relief seeping through her—it was so quiet, so still except for the small, purring sound of the water running over the clean, slaty stones. The sun was warm and she lay quietly resting, letting the tiredness seep out of her bones until they ached and she relaxed and slept, thrown like a limp rag on the sand.

When she woke clean-eyed, clear-headed, the sun was shining against the wall and she glanced at her watch. It was nearing five and time to get back. She could stand the wind now; she could stand anything. She glanced upwards and caught her breath. No where was there a single foothold. She remembered Joel's warning—it's not going down but coming back—that shale's dangerous stuff.

She walked quickly, following the stream, examining the stones desperately, tried digging toes with a broken limb, only to find no purchase for her feet. She wondered what had happened to Roanie, if he had gone home, if Joel would come to look for her—if he could follow Roanie's thought on the prairie grass, and prints not.

She bathed her face in the clear water, drank some of it, and proceeded cautiously, examining the walls, coming at last to a shelving cave, open to the air but slipping backwards beneath a great outcrop of rock—she started, then she stood, she entered, the cave was printed in rough letters: Windhaven.

Windhaven. Someone had been here before her. Someone had come here to escape from the wind, just as she had come. She advanced farther into the cave along a rough stone floor and her foot struck a light object. She bent to pick it up. It was a fine, old-fashioned comb set with tiny blue stones. A comb that her mother might have worn—or her grandmother.

She retraced her steps to the entrance of the cave. Stared at the rude carving. Windhaven. If a woman had come here all those years ago, she must have had some way of getting back. She hunted furiously.

It was so simple when she found it that she might have missed it had she not been so certain it had been there. A rough hair rope, hidden by the side of the great boulder, exactly the color of rock and shale. She seized it eagerly and planting her feet firmly, began with its support to climb. She reached the rope's end and found it anchored securely by a huge rock, invisible to those above. She pulled herself over the rim of the canyon and immediately she was conscious of the wind beating in her ears. She breathed in quickly, tired now only by her own efforts. She heard a heavier further along and rounded a curve to find Roanie grazing, dragging his rope.

She rode him with the wind behind her, it was no longer a fearsome thing, something from which there was no escape but in flight—Windhaven—she had only to climb down the canyon to sleep securely on the clean, dry beach. Why they could spend whole days there, she and Joel.

Joel came tearing along to swoop her up.

"Marnie, where on earth have you been? You look grand!"

"Windhaven? It was almost a sob as she remembered what she had ridden to the canyon that day. "Oh, darling, I'll never leave you. I'll never go away."

Roger Cole has state police troopers to confirm his story about a house hitting his car. Cole's car was parked on the shoulder of U.S. 23, about seven miles south of Alpena, Mich., when a house-mov' crew approached on the highway. The side of the house clipped the side of Cole's car. 3176

MODEL SATELLITE ON DISPLAY—This plastic model of an earth satellite, which will be sent into space by rocket sometime in 1957 or 1958, is on exhibition at the Hayden Planetarium in New York. It was built by Popular Science Monthly after consultations with scientists assigned to the satellite project. Principal parts of the device are tagged.

## The Olympic Games

(ARTICLE NO. 2)

(My experiences in Track at the University of Houston, Texas, by Don Loadman of Regina, Canadian Junior Mile Champion)

A four-year track scholarship at the University of Houston, Texas, beginning in September, 1955, has greatly enhanced my interest in track and field.

At this university I am majoring in Physical Education and running in middle distance events for the university track team.

This scholarship has really opened up my future in track. I am running in a place where there is an ideal climate suited to year-round track activity. I am on this scholarship along with 25 other freshmen. We have one of the best track coaches and he knows how to run an effective track team. I have been running cross-country for the university and will be working on the 880, mile and the relay when I go back after Christmas vacation.

We started our track season by running cross-country, as do many other universities throughout the world. Cross-country is one of the greatest conditioners for those running distance events. I have been running the two and three mile cross-country races, which is something totally different for me. It is giving me valuable experience. These races are usually run on flat or hilly courses with a large field of runners participating.

During the fall I competed in two official cross-country races. My first competitive race was in Austin, Texas, over a rough grassy and hilly course. My time for the three mile course was 15:04, and I managed to place seventh. This I think, was one of the most strenuous and tiring races I have run.

On December third I participated in the University of Houston's two-mile A.A.U. cross-country meet. Universities from all over the southern states were represented with 103 runners in the race. This was the largest field of runners I have ever competed against. I managed to place fourth in this race finishing in 9:29. Our team won the A.A.U. championship in this race on total points.

The track team has lately been back on the track working on the sprint and distance relays and the middle distance men are beginning to work on the mile. My best mile time so far has been 4:21.46 seconds better than my Saskatchewan time. I have hopes then I go back after Christmas vacation to really get my mile time down far enough to be able to qualify for the Canadian Olympic team in 1956.

At a university such as this you meet just as good or better than yourself, which gives you a goal toward which to work and constant competition which you cannot expect to get in smaller centers such as our cities in Saskatchewan where we lack tracks on which to practise and have such a short season for track competition.

## Urge supplementing roughage with coarsely ground grain

REGINA—Early snowfall and continuous cold weather in Saskatchewan is causing concern among some cattlemen who find what once appeared an adequate supply of roughage for the winter disappointing at a rapid rate.

If a shortage of hay and roughage looks fairly certain, farmers would be well advised to start now to limit the amounts of roughage fed daily and supplement with coarsely ground grain, according to W. Eric Rogers, livestock specialist with the department of agriculture.

A mixture of ground oats and barley or wheat can be used to replace a good part of hay fed and from a food value standpoint six pounds of grain will provide as much energy as eight to 10 pounds of average quality hay. Mature beef cows and bred heifers may be fed half the hay required, provided they are also given five to six quarts of good grain mixture daily. Mr. Rogers stressed that any change in feeding programs should be made gradually, but that extra grain should be fed during extremely cold weather.

Cattle are naturally adapted to a roughage diet, so it is important that some hay or chaff straw be fed regularly in order that their digestive systems may function properly. For this reason, a program of limiting hay fed now in order to ensure a supply of some good hay throughout the winter is a better plan than to suddenly change to heavy grain feeding if and when roughage supplies run out.

If roughage fed is mostly straw or poor quality hay, Dr. Bell of the University of Saskatchewan recommends that a vitamin B<sub>12</sub> supplement be added to the daily ration.

When feed supplies are limited, the need for a balanced mineral supplement becomes even more important. A single mineral supplement which can be made on the farm will provide extra nutrients required for animal health where animals are allowed to take their own salt daily.

A farm-made mineral mixture

designed by James Simpkins, Ottawa, and is being engraved and printed by the Canadian Bank Note Company, Ottawa. The stamp will be horizontal, approximately 1 1/2" x 1" in size, will be blue in color and will be issued to postmasters in panes of 50 stamps each.

Principal Canadian post offices will have the new stamp for sale on the 23rd January. Orders for this stamp in selected mint condition may now be sent to the Philatelic Section, Financial Branch, Post Office Department, Ottawa 4, Ontario. The orders will be filled and returned at the earliest possible date after the 23rd January.

Orders for new issue postage stamps only will be given preference over mixed orders for both the new issue stamp and other issues. This postage stamp is of the commemorative type and will not be re-issued when the original supply is exhausted, and will not be overprinted with the letter "G" to indicate its use by federal government departments.

**AUDITOR'S CERTIFICATE**

I have audited the accounts of the Coleman School District, No. 1216 for the year ending December 31, 1955, and have compared the said accounts with their relative vouchers and certify that in my opinion the foregoing financial statements are properly drawn up so as to exhibit a true and correct view of the financial affairs

of the School District according to the best of my information, the explanations given to me, and as shown by the records, subject to any qualifications mentioned in Auditor's Special Report.

(signed) T. A. COLLISTER,  
Coleman, Alberta.

Date of Audit, January 23rd, 1956.

**---Weddings---****WILSON - TIBERGHIE**

A recent double ring wedding ceremony was solemnized at St. John's Anglican Church, Calgary, when Miss Myrtle Juanita Wilson, daughter of Mr. and Mrs. Harry Wilson of Calgary, became the bride of Mr. Walter Tiberghien, son of Mrs. Violet Tiberghien and the late Mr. A. Tiberghien of Coleman, Alberta. Reverend Maurice W. Helston officiated.

The bride was given in marriage by her father and for her wedding wore a waltz length gown of white crystalline and net. Her veil was finger tip length nylon net sprinkled with sequins, and was held in place by a head band of pearls and sequins.

She carried a white prayer book covered with an orchid and sweetheart roses.

Mrs. Irene Harrison, matron-of-honor, wore a rust crystalline dress and carried a muf of yellow baby mums with head-band to match.

Miss May Forbes the bridesmaid, wore a green crystalline dress and carried a muf of rust baby mums with head-band to match.

Miss Randy Wilson, niece of the bride, was the flower girl who wore a yellow nylon dress and carried a muf of pink carnations.

Mr. Marvin Vangotsinoven was groomsman and Mr. Don. Wilson, brother of the bride and Mr. Gordon Oliphant ushered the guests.

Miss Audrey Walker was soloist and sang "Oh Perfect Love" during the signing of the register.

The reception was held at the Isle of Capri where Mr. Jack Moore proposed the toast to the bride.

To receive the guests Mrs. Wilson wore a winter white bengaline dress with winter white shoes, turquoise hat and gloves, while Mrs. Tiberghien wore a rose taffeta dress topped by a navy granada cord redingote with navy accessories.

Out of town guests included: Mr. and Mrs. R. Peters, Lethbridge; Mr. and Mrs. W. Almond, Faye and Virginia, sisters of the groom, Coleman; Mrs. F. E. Garrison, Spokane; Peter Kovacic, Edmonton; Alan Tomlins, Banff; Mr. and Mrs. Geo. Jenkins and Mrs. Phemia Bernard, Coleman.

Mr. and Mrs. Tiberghien will reside at 527 - 15th Ave. West, Calgary.

**POWLYK - PARK**

A quiet wedding was solemnized in St. Alban's Anglican Church on January 28, when Mrs. Kathleen Powlyk was united in marriage to Mr. J. Park. Rev. F. A. Dykes officiated.

The bride wore a navy blue ensemble with white accessories and a corsage of roses. Mr. and Mrs. W. T. Petifor of Lacombe supported the bride and groom.

A small reception was held in the brides home after which the happy couple left for Lethbridge to spend a few days.

**Card of Thanks**

I wish to thank the Coleman Fire Brigade, Neighbors, the Board of Trade, Elk Lodge members and all others who helped and so kindly assisted us during and since the fire which destroyed so much of my business establishment.

My sincere thanks to all of you.

Mr. O. Celli,  
Celli's Building & Supplies

## MULTIPLE SCLEROSIS

## Many can help in this cause

Everyone wants to be a researcher, but only a very few individuals have the opportunity and thrill of making great scientific discoveries.

Here is a chance for every Canadian to play a very important part in a research project that aims at trying to find out the cause and cure for multiple sclerosis. For any of you who do not know about this disease, it attacks the central nervous system with resulting impairment of various body functions, causing such symptoms as: imbalance and incoordination, numbness, tremors, defective vision, slurred speech, bladder and bowel difficulties. It is often referred to as the "disease of young adults", since it most frequently affects those persons within the 20-40 age bracket.

Many can help in the search for the cause and cure of multiple sclerosis. The scientists, who are devoting their lives to this study, need to know the names and addresses of sets of identical twins, one of whom is suffering from multiple sclerosis. Statistics tell us that there are probably 40 identical twinning in Canada, meeting the requirements of this study.

There are two types of twins: Identical and Fraternal.

Identical twins are recognized as being of the same sex and apparently similar in most physical characteristics, as well as in personality and intellectual traits.

The other type, known as fraternal twins, may be of the same or different sexes, and although born at a single birth, have no closer relation to each other than any other brother or sister.

In the case of identical twins, one being afflicted with multiple sclerosis, nature provides us with a ready-made laboratory experiment in determining the relative importance of possible environmental and genetic factors. It is obvious that the scientific researchers need to know who and where these twins are, so that they can go ahead with their task of using "Project Twin", to help track down the cause of this mysterious disease.

Everyone is not qualified to work with test tube and microscope in a laboratory, but with pencil or pen, many can contribute mightily toward the success of this project. No twins, no project, and one source of possible valuable research closed off. Write to: Multiple Sclerosis Society of Canada, P.O. Box 187, Station "C", Montreal 2, P.Q., giving the name and address of a set of identical twins, one of whom has multiple sclerosis.

## March of Dimes bringing polio victim home

Special arrangements are being made to fly a Saskatchewan doctor, paralyzed by polio, from England to the University Hospital in Saskatoon. This was announced by the local March of Dimes office.

Dr. A. Forrester, provincial chairman, announced that funds will be made available to assist Dr. James Ashwin in returning to his native province for advanced rehabilitation care.

Dr. Ashwin, whose home is in Prince Albert, received his training in Saskatchewan. He was serving as a medical missionary in Ludiana, Punjab, when he contracted polio in 1955—with resultant severe paralysis of arms, legs and back. English surgeons consider him sufficiently improved that he can be flown to Saskatchewan with the aid of a special nurse.

In spite of his severe involvement, plans are being prepared to eventually return him to practice in the field of his specialty.

The National March of Dimes office in Montreal is in charge of arranging the details of the overseas trip.

## Gamma rays keep spuds sproutless

A Cornell University potato specialist says atomic waste material may someday give us spuds that will stay sproutless in storage for several months.

Dr. Ora Smith said that research at Brookhaven National Laboratory has shown that irradiation of gamma rays from atomic waste—while it's an expensive control method—does keep potatoes from sprouting.

Treated potatoes already have stayed sproutless for a year and a half, he said. It's estimated this would cost between eight and nine cents a bushel on a commercial setup.

## WEEKLY BIBLE COMMENT

## OUR FAITH IN LIVING JESUS POWERS RELIGION

Christmas is behind us for another year. From the light of the blazing star of Bethlehem we are soon to enter into the shadowed places, the dark and terrible ways which lead to the brightest light of all—Easter morning and the Resurrection.

It is this—the Resurrection—the profound conviction of this fact in the life of Jesus which has been the motivating power of Christianity. It is the faith that Jesus lives, and that He is leading us onward.

Consider the miracle of Christianity itself. What less than conviction that Jesus had risen and revealed Himself to them could have arrested the disciples in their hour of complete despair? What else could have sent them forth in a new-found faith, prepared to serve, suffer and if need be die for the glory of spiritually carrying on the work of their King?

Their faith, like their works, was the evidence of the transformation through which they passed as they knew that Jesus lived, and they understood the words concerning His death and Resurrection—the words that but a few weeks before had seemed so inconceivable.

Would God that we, also, experience fully in the days of our lives the risen Christ as the disciples knew Him. Would that we find the power that these humble men found through the Resurrection.

## Winter feed supplies alarming

REGINA.—Saskatchewan's livestock producers' winter feed supplies are disappearing at an alarming rate, R. E. McKenzie, director, provincial plant industry branch said.

In spite of the fact many farmers put up more hay of better quality than in years past, supplies are dwindling rapidly as low temperatures and blizzard conditions prevail, he added.

Severe weather since early November has made heavy feeding necessary and quite a number of farmers who thought they had enough fodder for a normal winter now fear a shortage before spring, he said. The situation was developing despite one of the best hay crops on record, coupled with excellent harvesting conditions.

As a first step to meet a possible emergency situation, the department of Agriculture will immediately begin to compile lists of surplus fodder available, Mr. McKenzie went on. These lists will be made available to farmers who need extra feed.

Farmers who have hay to sell should report to the Agricultural Representative or Municipal Office in their area. From here information will be sent to Regina where lists will be made up and issued weekly, the director said. Although some farmers will be short of feed if present weather continues, he said, others will have reserves over and above their needs.

The department is interested in getting out of province listings as well, said Mr. McKenzie, and farmers in Alberta or Manitoba with feed for sale should write directly to the department of Agriculture at Regina.

Mr. McKenzie emphasized that the department is not buying or selling hay, but merely locating supplies for farmers short of feed so they can make their own arrangements.

## Quick Canadian Quiz

1. Which of the provinces has the greatest fresh-water area?
2. Of Canada's annual retail business, do chain stores do 54 per cent, 39 per cent, 12 per cent?
3. Who was Juan de Fuca?
4. In 1939 Canadians paid federal taxes of \$45 per capita. What is today's payment per capita?
5. In 1945 the federal government employed 115,908 persons. What is today's total?

## ANSWERS TO QUICK QUIZ

1. At July, 1955, total was 188,128. 3. 15th century navigator who discovered the strait between southern Vancouver Island and the mainland, 1. Quebec, 4. About \$300. 2. 17 per cent.

A cow is milked on the right side. 3176

\$1,251,200—All-time record purchase price for a horse is what Leslie-Combe II paid for Nashua, "horse of the year." The fabulous racer is shown above with his trainer, Sunny Jim Fitzsimmons, 81, the grand old man of American racing. Owner of Spendthrift Farms, heads the combine which purchased the sleek beauty from the estate of the late William Woodward, Jr.

## Last voyage for Cutty Sark

The famous old sailing clipper Cutty Sark, launched at Dumbarton, on November 23, 1869, made her last voyage recently when she was towed from East India Import Dock to her permanent berth at Greenwich, London, S.E. For this operation on her last day afloat she had to be lightened as much as possible to reduce her draught, consequently her upper masts and yards had been removed as well as deck houses and ballast.

The special dry dock in which she will be preserved at Greenwich is constructed of mass concrete and is 265 feet long and 60 feet wide. The Cutty Sark, which has a length of 212 feet, beam of 36 feet, depth of 21 feet, and was 936 tons gross, sailed on her maiden voyage from London to Shanghai on February 16, 1870.

Her last voyage in the tea trade (Woolong to London) was in 1877.

Her first voyage in the wool trade (Melbourne to New York) was in 1879 and her last in 1895, when she was sold to the Portuguese. She was bought back in 1922 and presented to the Thames Nautical Training College at Greenwich in 1938. She was handed over to the Preservation Society and received on the Society's behalf by the Duke of Edinburgh on May 28, 1953.

The average typewriter ribbon measures 25 feet.

## Analysis shows value old coins

Through chemical analysis, Dr. Earle R. Calley of Ohio State University is able to tell if coins and other ancient brass objects are the real thing.

By studying coins of known date, the professor has learned that the oldest Roman coins struck from the alloy contained the least copper and the most zinc. In the 250 years during which the Romans used brass, there was a steady increase in the amount of copper and a corresponding decrease in the amount of zinc in the coins.

He pointed out that by determining the zinc content of a coin it was possible to establish roughly the earliest date at which a brass coin could have been made. "The earliest known Roman brass coins were issued under Julius Caesar about 45 B.C., but the abundant issue of such coins did not begin until about 23 B.C. under Augustus," he said.

"Vast numbers of these coins were issued under various emperors between this date and 500 A.D., the approximate time of the end of the ancient coinage of this alloy."

SO THE STORY GOES . . . So the story goes, petrels were named for their habit of flying low over the waves, with feet hanging down as though walking. They were named for Peter of old who walked on the water.

## The Sports Clinic

Conducted by Lloyd "Ace" Percival

## How to play better badminton

An important but simple fundamental of badminton is — hold your racket right. Ignore this rule, and it can prevent you from becoming a top player. Fortunately, it's a simple thing to straighten out.

Here's what to do. Clasp the racket with the left hand at the throat of the handle, just under the face of the racket. The face, or striking surface should be vertical. Now, "shake hands" with the handle with your right hand, thumb on the left side, index finger on the right. Your little finger should be at the extreme end of the handle.

Keep the hand and fingers loose and pliable. Don't clutch the racket hard until you actually hit the bird. Then relax the hand again and rest up for the next shot.

Another important fundamental is wrist flexibility. It is practically impossible to play well while using a locked or stiff wrist. Get plenty of wrist snap into your shots. Learn to whip the racket around with a loose, flexible action and then slam the bird across the net.

## A special report

Sports College often is asked why tea has become popular with so many trainers and athletes as part of the training diet, and for special use before, during and after games and practices. Here's a report that may shed some light on the subject.

In May, 1955, Dr. Richard L. Jenkins, chief of the Neurology Service, Veterans' Administration, Washington, D.C., presented a paper on the physiological effects of tea to the New York Academy of Science. He reported that tea produced: A. Increased mental alertness; B. Alertness and brighter spirits; C. More acute and discriminating sensations; D. Facilitation of association of ideas; E. More discriminating judgment. These statements were a result of actual testing.

Physiologists Stanley and Schlosberg, using simple reaction time tests, found that tea significantly increased these faculties.

In associating these facts with athletic activity, it's quite easy to understand why tea is being used more and more in sports.

## Death separates long-wed couple

The 80-year-old marriage of Ben and Drusilla Hartley, regarded as the longest in the United States, ended in his death recently.

Benjamin Hartley, 96, who married his boyhood sweetheart when both were 16, had been in failing health since he fell on his son's farm near Sagle, Idaho, in July.

He is survived by his widow, three sons, 15 grandchildren, 51 great-grandchildren and 51 great-great-grandchildren.

## Ticklers

—By George

"No wonder he's called 'Mule' Watson. Whadda wallop he packs in his left!"
